It is a common belief that environmentalism and the agricultural industry are incompatible with one another. However, as human activity continues to degrade our planet, lawyers, regulators, and even farmers are beginning to explore productive and realistic ways for agriculture to become more sustainable. The Vermont Journal of Environmental Law 2019 Symposium will foster provocative discussions about adapting agricultural and environmental laws, regulations, policies, and practices to help reconcile the goals of the agricultural industry with environmental goals.

Free and open to the public and press.
