

Windows 7 Wireless Setup Instructions

- Click the start (Windows Icon) button
- Search for **Manage Wireless Networks** and hit enter
- Click **Add**
- Click **Manually create a network profile**
- Enter the following information:
 - **Network name:** VermontLaw [NOTE – this is case sensitive]
 - **Security type:** WPA2-Enterprise
 - **Encryption type:** AES
- Leave **Security key:** blank.
- Click **Next**
- Click **Change connection settings**
- Click the **Security** tab
- Click **Settings**
- Uncheck **Validate server certificate**
- Click **Configure...**
- Uncheck **Automatically use my Windows logon name and password**
- Click **OK**
- Click **OK**
- Click the **Advanced Settings** button
- Put a checkmark in the box entitled **Specify authentication mode**
- Ensure that the authentication mode is set to **User or computer authentication**
- Click **OK**
- Click **OK**
- Click **Close**
- You should see a bubble appear with **Additional information is needed to connect VLS.**
- Click the bubble.
- Enter your VLS username and password.
- Wait for the network to fully connect. This may take a minute or two.
