

Certificate in General Practice Declaration Form 2018-2019

Student Name: _____

Graduation Year: _____

Certificate Requirements:

To receive a Certificate in General Practice, students must complete 16 approved credits during their second and third years. Students are also encouraged to participate in an externship, an internship, a Semester in Practice (SiP), or a Legal Clinic, approved by the Director; these experiences fulfill up to 6 credits of the 16 credit requirement. In addition, at least 8 credits of the 16-credit requirement must come from GPP courses (highlighted in yellow below), including at least 4 credits from GPP Practice Labs. The Director has discretion to alter the distribution of required GPP course credits between GPP Practice Labs and other GPP courses, taking into account the availability of GPP Practice Labs during any particular time frame. At the discretion of the Director, there may be additional non-curricular or professional requirements that students must meet in order to receive the certificate. The list below includes the Practice Labs and GPP courses as well as other courses in the VLS curriculum which have substantial simulation content and may be used to complete the required credits.

Course Options
