Class 1: Introduction and Overview

For Class Discussion:

Please identify a current or past hazardous/toxic chemical land or water problem near where you grew up. You may find this by searching google, the Superfund Enterprise Management System (SEMS) database or news sources. Superfund sites, hazardous waste sites, brownfields, manufacturing facilities and groundwater contamination are all options. Please prepare to briefly describe the problem and how it is or is not being addressed.

Hazardous Waste: 7-8, 275-279
