

Jonathan Rosenbloom
Resilience & Sustainability
Assignment #1 – Spring 2020

- Read over the syllabus.

- Read pages 1-6 in textbook: Shelley Ross Saxer & Jonathan Rosenbloom, **Social-Ecological Resilience and Sustainability (Wolters Kluwer 2018)**.

- Be prepared to share a recent news article **identifying a NOT sustainable or resilient condition or behavior**. Be prepared to describe, i) the issue, ii) individuals, decisions, and actions that contributed to the issue, and iii) how the issue is relevant to the law. [An example might be explaining how the 2015 incident in which Volkswagen illegally circumvented emission regulations for about 11 million diesel cars is unsustainable](#). Email me one summary sentence on the not sustainable or resilient condition or behavior and the full citation to the article before class begins.
