

To: LLM in Environmental Law Class of 2023
LLM in Energy Law Class of 2023
LLM in Food and Agriculture Law Class of 2023

From: Anne Linehan, Interim Director, Graduate Academic Programs and Associate Director,
Environmental Law Center

Date: Summer 2022

Greetings from Vermont Law and Graduate School. I am an academic planning advisor for students in our environmental degree programs. I have worked here for 25 years and every year I enjoy welcoming a new group of LLM students to campus.

Here are some important dates to keep in mind as the fall semester approaches:

Monday, August 15–Wednesday, August 17: individual advising sessions (virtual)

Thursday, August 18: registration for fall and spring classes opens (online)

Wednesday, August 24–Thursday, August 25: LLM Orientation (on campus)

International students who have not studied US law are encouraged to attend the full orientation for incoming JD students, August 22-25.

You will be registering for both fall and spring semesters but will have the opportunity to add and drop courses during the first two weeks of each semester. You will also have the opportunity to revise your spring course schedule in a special add/drop period in October. You will register for summer courses next spring.

It is a good idea to spend some time before Orientation thinking about what courses you want to take; whether you want to participate in a clinic, research team, or externship; and how you plan to fulfill all of the degree requirements. To help you plan, I have enclosed the fall and spring class schedules and planning guidelines for your degree.

Please feel free to email me with any questions at alinehan@vermontlaw.edu. I look forward to meeting you soon!

**2022 ORIENTATION
AT-A-GLANCE SCHEDULE**

Draft Schedule – 6-21-22 – subject to change

LLM in Environmental Law, LLM in Energy Law, LLM in Food & Agriculture Law

WEDNESDAY, AUGUST 24

- | | |
|-----------------------|---|
| 9:00-10:00 AM | LLM Welcome and Introductions Yates Common Room, Debevoise Hall |
| 10:00-10:30 AM | Campus Tour Starts at Yates Common Room |
| 10:30-11:30 AM | Strategic Academic and Career Planning Nina Thomas Classroom, Debevoise Hall |
| 1:00-2:00 PM | Technology Service and CampusWeb Nina Thomas Classroom |

THURSDAY, AUGUST 25

- | | |
|-----------------------|--|
| 8:30-9:30 AM | Financial Aid Oakes 208 |
| 10:45-11:45 AM | Diversity Session Chase Community Center |
| 12:00 PM | Brown bag lunches available Yates Common Room |
| 12:15-1:15 PM | Environmental Legal Research Skills (optional) Oakes 208 |
| 1:30-2:30 PM | Library Resources and Services (TWEN and Lexis passwords) Cornell Library |
| 2:45-3:45 PM | Overview of Environmental Law Oakes 208 |
| 4:00-7:00 PM | Welcome BBQ Debevoise Back Lawn |

Experiential Opportunities

Vermont Law and Graduate School offers opportunities to supplement classroom learning with real-world, hands-on experience. Our experiential offerings focus on energy, food and agriculture, environmental justice, and climate change. Each program has space for incoming students; **please apply by August 5, 2022**, for these limited enrollment opportunities. Interviews will be set up for qualified students during Orientation week (August 22-25). Research Assistants may be compensated through the Federal work-study program, receive academic credit, or just gain great experience.

Institute for Energy and the Environment/Energy Clinic

The IEE offers opportunities for any master's or LLM student to apply for our research associate program, which provides experiential learning opportunities in support of the clean energy transition. Past student projects have worked on climate justice projects, renewable energy policy, the smart electric grid and energy cybersecurity, and clean transportation policy. The Energy Clinic works on legal and business models to advance community owned renewables in Vermont and neighboring states and in collaboration with the Center for Agriculture and Food Systems, launched a Farm and Energy Initiative to promote clean energy self-reliance in the agricultural sector, solar siting on agricultural land and other farm and energy issues. IEE student team members, in addition to structured research and experiential opportunities, have opportunities to coauthor articles and reports, gain access to conferences and workshops, collaborate with international scholars, and participate in IEE team and social events. For more about the IEE's current projects, visit www.vermontlaw.edu/energy. Feel welcome to schedule an informational call with the IEE Director or other faculty. To apply to the IEE research team or clinic, please send a resume and letter of interest to Molly Smith, IEE Program Coordinator, at msmith@vermontlaw.edu. Application review will begin on August 15, 2022.

Center for Agriculture and Food Systems

CAFS is a center for research and advocacy, and students can become involved in a few different ways. CAFS Research Assistants work on scholarly and applied research that spans the food system, including issues addressing animal welfare, workers' rights, food waste, social justice and equity, public health, access to land, support for local foods, environmental protection, climate change, and sustainability. For more about current CAFS projects, visit: www.vermontlaw.edu/cafs. To apply for the Research Assistant program, please provide a resume and cover letter to Claire Child at cchild@vermontlaw.edu.

Animal Law and Policy Institute/Farmed Animal Advocacy Clinic

The Animal Law and Policy Institute trains future leaders in animal advocacy while centering animals in the fight for environmental protections. Engaging with policymakers, journalists, advocacy organizations, and communities, the Institute serves as a resource hub for animal law and policy issues. It also collaborates closely with other VLGS programs, encouraging the wider legal community to expand protections for animals. The Farmed Animal Advocacy Clinic (FAAC) empowers students to become effective advocates for animals while also developing skills that can be applied in a variety of arenas throughout their careers through hands-on experience with real-world matters. Students represent clients in litigation as well as legislative, policy, and regulatory matters aimed at improving the treatment and status of farmed animals. To apply for the FAAC, please provide a resume and cover letter to Molly Russell at mrussell@vermontlaw.edu.

Environmental Justice Clinic

Learning opportunities at the Environmental Justice Clinic include administrative and other forms of advocacy on behalf of legally underserved communities that are overburdened by toxic sources. This includes a wide range of activities such as brief writing and participation in negotiations; skill building in

the areas of client relations, case development, issue identification, fact development, legal research, and legal writing; and litigation to compel disclosure of information and to compel timely action. Please submit your current resume and a statement describing your interest in the practicum to Joe Anderson at janderson@vermontlaw.edu.

Environmental Advocacy Clinic

The EAC is an in-house clinic that operates as a public interest law office. Students work under the supervision of clinic faculty on real-world cases for classroom credit. Clinical experience helps students become skilled professionals who can develop arguments and claims from the ground up, explore strategies and options, and communicate effectively with clients, courts, agency officials, scientific experts, and opposing parties. Student clinicians work directly with leading conservation organizations and local community groups to promote access to justice on important environmental issues. Learn more about the EAC at its [website](#). Please submit your current resume and a statement describing your interest in the clinic to Joe Anderson at janderson@vermontlaw.edu. Applicants should have exceptional English speaking and writing skills. The EAC is open to JD and LLM students only.

Transnational Environmental Law Practicum

The U.S.-Asia Partnerships for Environmental Law (PEL) works collaboratively with government institutions, non-government organizations, lawyers, judges, lawmakers and more to promote positive environmental governance throughout Asia. This practicum will combine substantive classroom instruction with project implementation, with students teaming up to work on an environmental-related legal or policy research project for a partner organization in China or a developing country in Asia. The projects will support PEL's partnering organizations' environmental advocacy and legal reform work on the ground; they will provide students with an opportunity to learn about specific environmental challenges and the gaps in the laws and policies in these countries and to apply theories and concepts learned in the classroom. Partner organizations include environmental non-governmental organizations (NGOs), government agencies, prosecutors, and law scholars. Students can enroll for 4 credits on a Pass/Fail basis, and enrollment is capped at 12. Students interested in the Practicum for the fall should email Claire Andrews at candrews@vermontlaw.edu as soon as possible with a short statement of interest (no more than 1 page) and their resume. Decisions will be made on a rolling basis.

International Climate Change Law (ENV5218)

International Climate Change Law is a 3-credit hybrid classroom/experiential course about the major climate change treaties – the United Nations Framework Convention on Climate Change, Kyoto Protocol, and Paris Agreement – via theory and first-hand observation. Students represent VLS as a non-governmental observer delegation at the annual Conference of Parties (COP) while also engaging in service learning by supporting negotiators and/or other participating parties. This fall semester course is organized around two components: a weekly class for the full semester and one week of onsite experiential learning at the COP. By doing applied learning in international climate change law, students develop an understanding of international environmental lawmaking informed by direct experience. Acceptance into the course does not guarantee attendance as a student delegate at the international climate negotiations, which is subject to the quota VLS will receive from the Secretariat along with any specific plans related to COVID. Students who are accepted to the course will receive information about logistics, including travel and expenses, directly from the instructor. To apply, please email Derek Walker at dwalker@vermontlaw.edu.

Global Sustainability Field Studies – Cuba

For those interested in traveling to Cuba with us this fall during Thanksgiving week for our 1 credit Global Sustainability Field Studies Course to study energy and agricultural sustainability in Cuba, now is the time to apply. Please email Prof. Kevin Jones at kbjones@vermontlaw.edu for more information on the course and how to apply.

LLM in Environmental Law Program Planning Guidelines

Requirements of the LLM Degree

- A minimum of 30 credits, including all required courses
- Minimum cumulative GPA of 2.30 for successful completion of the degree
- Students have up to 5 years from the date of matriculation to complete the LLM

Required Courses

You may meet these requirements by taking the course, transferring in credits, or by waiver.

- LLM9606 LLM Graduate Seminar (3 credits)
- ENV5105 Administrative Law (3 credits)
- ENV5115 Environmental Law (3 credits)

The Director of the ELC may waive any of the above requirements, except for the Graduate Seminar, upon showing that the candidate has completed an equivalent course of study.

Thesis, Teaching Project, or Research Project

You have the option of writing a 6-credit thesis, which must be a substantial piece of written work of publishable quality. In order to write a thesis, you must submit a 10-15 page thesis proposal to be approved by your faculty supervisor and the Director of the ELC. You also have the option of completing a 4-6 credit teaching practicum or a 2-6 credit research project. A 5 page project proposal must be approved by your faculty supervisor and the Director of the ELC.

Electives

Any remaining courses may be chosen from the approved list in the Academic Regulations.

Transfer Credits

You may transfer in up to 6 credits from another accredited LLM program. The courses transferred must be substantive environmental courses. Courses completed more than 5 years prior to matriculation will not transfer. Grades for transfer credits must be "C" or better. The transferred grade is reflected on the VLGS transcript but is not used in computing the GPA.

Externships

You may arrange a master's or LLM externship on your own or select from the many postings at the VLGS Career Services Office. Externships may be a minimum of 4 credits and a max of 10 credits. You may pursue two externships as long as the total number of externship credits for all semesters does not exceed 10 credits. 45 hours of externship work equals one credit. An externship should be completed in one semester. Before beginning an externship, you must submit a contract executed by you, your on-site mentor, and your faculty supervisor. Externships must be sponsored by a VLGS faculty member. The Master's Externship Handbook and contract form are available at www.vermontlaw.edu/MastersExternships.

Academic Planning

During the registration process, work with your academic planning advisor to establish a tentative schedule of courses you plan to take for your degree, subject to later modifications. Consider what, if any, courses you want to transfer or waive. It is your responsibility to ensure fulfillment of all degree requirements. Check with the Registrar if you have questions regarding your degree status.

Tuition Billing

Master's and LLM students are billed on a per-credit basis. For further information, contact the Business Office at studentaccounts@vermontlaw.edu.

Summer Session

Summer Session registration begins in April. You can look at the previous year's summer calendar to get an idea of what classes will be offered residentially.

Online Classes

All of the master's and LLM required courses, as well as many electives, are available as online, asynchronous classes. Online semesters are divided into two terms; each online class is seven weeks long and worth three credits.
