VERMONT SCHOOL FOR THE ENVIRONMENT

Vermont School for the Environment at Vermont Law and Graduate School trains students to create cutting-edge solutions to environmental and social challenges. VSE degrees provide a strong public policy education grounded in intersectionality between environmental and social challenges.

VSE builds on Vermont Law and Graduate School's depth of expertise in domestic and international law and policy focused on the environment, clean energy, sustainable food and agriculture, and animal protection. The interdisciplinary graduate

curriculum brings climate change and racial and economic justice to the forefront.

VSE courses impart practical skills and provide the rigorous training students need to succeed in the job market—whether in the public, private, or non-profit sectors, students graduate from VSE equipped to have impactful careers in this growing field.

“In serving as champions for environmental protection and justice, we serve as champions for the entire world community and the future generations who will inherit our planet—nothing we do matters more.”

—RODNEY SMOLLA, President,
Vermont Law and Graduate School

Master's Degrees

Master's degrees at Vermont School for the Environment incorporate just and sustainable innovations in environmental policy. Students gain skills needed to shape environmental policy and integrate issues of racial and economic justice into policymaking. Our curriculum and robust experiential opportunities prepare students for the job market, giving them the substantive knowledge and skills needed, in addition to their individual passion, to effect positive change through their careers.

Master of Climate and Environmental Policy

The MCEP is a robust applied public policy degree dedicated to the environment. Degree-seekers will receive the tools needed to make change—especially finding and implementing solutions to the greatest challenge of our day: the intersection of climate change and environmental justice. All MCEP students choose between a “research track” to write a thesis, or a “practice track” to pursue an externship or on-campus clinic.

Master of Energy Regulation and Law

The MERL program responds to opportunities presented by the rapid growth of the clean energy sector, as well as the environmental challenges associated with traditional energy production and transmission, by offering intensive training in energy law, regulation, markets, and policy analysis. MERL students may participate in the Institute for Energy and the Environment's Research Associates Program, working on emerging issues in energy law and policy. The MERL is available residentially and online.

Master of Food and Agriculture Law and Policy

The MFALP is designed for students who want to develop the infrastructure needed to support sustainable food and agricultural systems. Our unique and comprehensive curriculum, developed by the faculty of our Center for Agriculture and Food Systems, develops students' advocacy skills in the growing and dynamic area of food and agriculture policy. The MFALP is available residentially and online.

Master of Animal Protection Policy

The MAPP trains students in the policy advocacy skills needed to effectively advocate for animals. This degree focuses on the interconnection between human, environmental, and animal wellbeing. The MAPP is available residentially and online.

Executive Master of Environmental Policy

The EMEP is a streamlined environmental policy degree for mid-career professionals. It requires a minimum of three years of work experience and fewer credits than our other master's degrees. It is offered online only.

Skills Modules

Master's students take the following non-credit skills modules:

- **Professional Identity Formation:** Trains students in professional communications, as well as how to have respectful conversations about sensitive topics
- **Introduction to Diversity, Equity, and Inclusion:** DEI principles, anti-racism, and shared language around DEI issues
- **Public Participation:** How environmental public policies are influenced by community-led efforts
- **Negotiation and Consensus-Building:** Negotiation topics from a policy development perspective

Concentrations

Students in the Master of Climate and Environmental Policy program may develop their own concentration or choose to concentrate in one of three areas:

- **Climate Change**
- **Environmental Justice**
- **Environmental, Social, and Governance (ESG)**

“My externship experience with the U.S. Department of the Interior’s Office of the Solicitor is unparalleled to anything I have done. The topics discussed in my environmental law classes came to life in my work every day. The experience reaffirmed my appreciation for our national parks and my passion for wildlife.”

—MICHELLE R. AMIDZICH
JD/MFALP’22

Joint Degrees

Students may combine a master’s degree from VSE with a JD degree from Vermont Law and Graduate School to develop expertise in environmental, energy, food and agriculture, or animal law. These joint degrees may be completed in three years.

Summer Session

Our Summer Session is nationally recognized for its impressive range of courses taught by VLGS professors and leaders from national and international nonprofit environmental groups and research centers, federal and state agencies, academic programs, and the private sector. Attendees include graduate and JD students; citizen advocates; practicing attorneys; and state and federal agency personnel.

JD students from any other law school may earn a master’s degree from Vermont School for the Environment with one summer of classes, one summer externship, and at least one online course.

Environmental Externships

An integral part of our environmental degree programs is gaining real-world experience through externships. Our students explore environmental advocacy and policy in a wide variety of settings. Students work closely with our Master’s Externship Program to line up full-time or part-time placements across the country.

Recent Externships

- Advocates for the West
- Connecticut River Conservancy
- Environmental Working Group
- Federal Energy Regulatory Commission
- Georgia Department of Natural Resources, Environmental Protection Division
- Mercy For Animals
- New York Department of Environmental Conservation
- Northeast Wilderness Trust
- Northern Prairies Land Trust
- Nourish Colorado
- San Francisco Bay Keeper
- Small Business Utility Advocates
- U.S. Environmental Protection Agency
- Vermont Cannabis Solutions
- Vermont Natural Resources Council

Animal Law and Policy Institute

The Animal Law and Policy Institute trains future leaders in animal advocacy while centering animals in the fight for environmental protections. Students, staff, and faculty in the Institute advance animal protection through education, training, scholarship, and policy development. Engaging with policymakers, journalists, advocacy organizations, and communities, the Institute serves as a resource hub for animal law and policy issues. It also collaborates closely with other campus programs, encouraging the wider legal community to expand protections for animals.

The Animal Law and Policy Institute is dedicated to supporting aspiring advocates through robust course offerings, mentoring, and experiential learning.

Farmed Animal Advocacy Clinic

The Farmed Animal Advocacy Clinic (FAAC) empowers students to become effective advocates for animals while developing skills that can be applied in a variety of arenas throughout their careers through hands-on experience with real-world matters. Students represent clients in litigation as well as legislative, policy, and regulatory matters aimed at improving the treatment and status of farmed animals. With billions of land animals and even more aquatic animals farmed for food annually in the U.S., animals are involved in every legal institution, from local prosecutors to various state and federal agencies with overlapping authority and responsibility, and everything between.

Students in the FAAC learn how to navigate and engage with these institutions and the individuals who comprise them. FAAC students develop a wide range of advocacy skills that are central to farmed animal protection, but that are also transferable to other areas, including navigating ethics issues that arise in the context of impact litigation, building and managing coalitions and clients with divergent interests, client outreach and communication, developing relationships with experts, and navigating the relationship between legal and media strategies.

“The Animal Law and Policy Institute’s classes, practicums, and professors helped me realize my true passion of pursuing animal law. This past year I have honed my advocacy skills in a subject where our clients have no voice. Everything I have learned in the Animal Law and Policy Institute has set me up for success as I make the transition from graduate school to the professional field.”

—VANESSA BEANE MELP’22

Center for Agriculture and Food Systems

The Center for Agriculture and Food Systems (CAFS) trains

law and policy students to develop real-world solutions for a more sustainable and just food system. CAFS offers a comprehensive array of residential, online, and experiential courses. These diverse course offerings, the Food and Agriculture Clinic, and varied degree options give students the opportunity to explore food and agriculture law from a variety of perspectives and experiences. CAFS is also a center for research and advocacy. In partnership with local, regional, national, and international partners, the team addresses food system challenges related to food justice, food security, farmland access, farmworkers' rights, animal welfare, worker protections, the environment, and public health, among others. CAFS works closely with partners to provide legal services and policy support that respond to their needs and develop resources that empower the communities they serve. Through its Food and Agriculture Clinic and Research Assistant program, students work directly on these projects, engaging in innovative work that spans the food system.

Center Initiatives

- Train law and policy students in one of the first food and agriculture law clinics in the nation to work at the intersection of food, agriculture, and environmental law
- Support the local food economy by connecting small-scale farms and food entrepreneurs with free legal assistance through the Vermont Legal Food Hub
- Advocate for policy reform to protect farmworkers and other food system workers from exploitative labor practices and public health threats
- Empower consumers to understand food labels and make more informed food choices
- Assist farmers, including historically marginalized farmers and heirs' property owners, with land access and conservation through the Farmland Access Legal Toolkit
- Reduce food waste and address food insecurity through the National Gleaning Project

"I found VLGS's Master of Food and Agriculture Law and Policy program to be the most rooted in activism, social consciousness, and a land ethic of any of the options I considered."

—**ALYSSA HARTMAN MFALP'19**, Executive Director,
Artisan Grain Collaborative

Environmental Justice Clinic

Founded in 2019, VLGS's Environmental Justice Clinic focuses on interdisciplinary practice at the intersection of civil rights and the environment. Student clinicians work in partnership with communities of color and low-income communities on projects to address racial discrimination and improve environmental quality. Students work in small teams on projects to address inequality and discrimination in environmental decision-making as well as procedural inequities experienced by communities as they try to assert their own vision for the future of their neighborhoods, towns, and cities.

Environmental Justice Clinic Projects

- Work with communities of color around the country to fight harmful impacts of landfills and other polluting facilities
- Partner with community-based groups across Vermont and other states to strengthen policies to achieve environmental and climate justice
- Work with environmental justice activists to draft stronger protections through legislation at federal and state levels
- Advocate for state and federal policies to ensure enforcement of civil rights laws that protect environmental justice
- Challenge the disproportionate impacts of industrial animal production on communities of color and low-income communities

"The Environmental Justice Clinic was my first real experience doing any kind of environmental law work at all. And it was one of the most meaningful experiences I've had while at VGLS. It gave me a glance, a taste, of the contemporary work attorneys do in environmental law."

—LUIS GONZALES JD'23

Institute for Energy and the Environment

The Institute for Energy and the Environment (IEE) is a national and world energy policy resource focused on the energy policy of the future.

The IEE leads the nation in preparing students for the clean energy transition. Its energy law program has the largest selection of clean energy law and policy courses available, leading clean energy experiential opportunities, and a seamless integration with a world-class environmental law and policy program, including unparalleled climate law course offerings. The institute serves as a center for graduate research on the transition to a clean energy future and maintains a unique and vibrant student-staffed Energy Clinic, which works on developing and implementing legal and business models for community energy resources. In addition, a Research Associate program works more broadly on energy issues ranging from clean transportation policy to cybersecurity of the electric grid.

Institute and Energy Clinic Projects

- Develop legal and business models promoting community renewables ownership with a focus on increasing low-income solar ownership and advocating for climate justice
- Collaborate with the Center for Agriculture and Food Systems on the Farm and Energy Initiative, which unites interests in the economic health of farms and sustainable energy production
- Author books including *The Electric Battery: Charging Forward to a Low Carbon Future*; *A Smarter, Greener Grid: Forging Environmental Progress from Smart Energy Policies and Technologies*; and *Global Energy Justice*
- Research reports and publications on climate refugees, community choice aggregation, cybersecurity of the electric grid, smart cities and microgrids, clean transportation policy, and stakeholder governance in Regional Transmission Organizations

“VLGS has empowered me to push for a future where clean energy can be distributed equally throughout the world. The MERL has given me tools to see the bigger field at play and to be able to go where I want. A lot of people in the energy field don’t have such a specialized look at it.”

—CHARLES SPENCE MERL’19

U.S.-Asia Partnerships for Environmental Law

The U.S.-Asia Partnerships for Environmental Law

(PEL) is a collaborative program to advance environmental and energy law and policy in China and throughout Southeast Asia. The goal of PEL is to strengthen the rule of law in environmental protection and to build capacity among individuals and academic, government, and private-sector institutions to solve environmental problems in Asia. At its inception in 2006, PEL's goals were to strengthen the capacity of Chinese education, government, and civil society sectors to become effective environmental problem solvers; to improve China's policies, laws, and regulations to advance the development of environmental law in China; and to enhance municipal, provincial, national, and international networks in China to advance best practices in environmental protection and energy regulation. Building upon the success it has achieved in China, PEL has expanded its geographic scope to respond to the environmental governance needs of the region.

Partnership Projects

- Through an Environmental Mission Scholars program, provide experiential training to young legal professionals from China to become environmental advocates and stewards
- Train stakeholders, including judges and prosecutors, to apply and enforce environmental laws and take steps to increase the role prosecutors could play in civil enforcement of environmental laws
- Conduct practical legal research that promotes public participation in National Park governance
- A collaborative project to engage with Chinese scholars and prosecutors on wildlife protection laws and their enforcement in China and the U.S.
- Provide opportunities for regional dialogues among stakeholders to share experiences and lessons learned in developing an effective environmental governance system in response to local conditions

"PEL is building a support network and promoting public participation not only in China but also in Southeast Asia—which is amazing! PEL is empowering people to protect their environmental rights."

Transnational Environmental Law Practicum

The Transnational Environmental Law Practicum allows students to team up with organizations in Asia to work on research and consultation projects. Some of the research that students have done includes:

- Environmental governance systems of India, Mongolia, and Nepal, with a focus on legal mechanisms for public participation in providing natural resource safeguards in the development of large-scale linear infrastructure projects
- Policy and legislative frameworks to reduce emission of greenhouse gases (specifically short-lived climate pollutants) in countries throughout Asia
- Legal mechanisms for environmental impact assessment (EIA) of development projects, with a focus on providing policy suggestions for China

Law Laboratory for International Sustainable Development

The Law Laboratory for International Sustainable Development studies innovative law and policy instruments to promote sustainable development on a global scale. Law Lab works internationally with research institutes, NGOs, and development agencies from different countries. In 2022, partnering with World Resources Institute, Law Lab launched a multi-year research program studying policies and regulations safeguarding the social and environmental integrity of global supply chains, focusing on supply chains that are climate-significant and have little to do with sensitive issues such as national security. In a changing and riskier world, crises like trade disputes, the COVID-19 pandemic, and geopolitical conflicts have disrupted global supply chains and underscored the importance of supply chain resilience. Currently, the program focuses on three groups of supply chains: forest products, agricultural soft commodities, and renewable energy. Students may work as research assistants for Law Lab.

—WENFANG LIANG LLM'22

Environmental Tax Policy Institute

The Environmental Tax Policy Institute analyzes the ways in which taxation can be used to address environmental problems. By serving as a resource for the public and private sectors, nongovernmental organizations, the press, and academia, the Institute seeks to better inform the public policy debate about the role of environmental taxes at the federal, state, and local levels.

Institute Initiatives

- Active participant in the Global Conferences on Environmental Taxation; co-organizer of the 21st Global Conference in 2020, a global event
- Analysis of proposals for carbon taxes at the federal and state level, including key design issues, as well as the relationship between carbon taxes and cap-and-trade programs
- Exploration of the ability to earmark carbon tax revenues, published by Professor Janet Milne as “How Durable is a Lockbox for Carbon Tax Revenue?” in the *Pittsburgh Tax Review*
- Sharing of knowledge about other countries’ use of carbon taxes and other environmental taxes
- Development of *The Handbook of Research on Environmental Taxation*, edited by Janet E. Milne and Mikael Skou Andersen, and *Environmental Taxation and the Law*, edited by Professor Milne
- Research on how environmentally related taxes might help finance climate change adaptation, published as “Storms Ahead” in the *Vermont Law Review*
- U.S. contributor to a European project evaluating tax incentives that preserve cultural heritage
- Investigation of the potential role of environmental pricing in the emerging digital economy and the role of environmental taxation in ESG (environment, social, and governance) factors

Students in the Public Lands Management:
Montana Field Study class

Tuholske Institute for Environmental Field Studies

VLGS established the Tuholske Institute in 2021 in memory of Jack Tuholske, a beloved faculty member, renowned litigator, and pioneer in field studies for environmental law students. The institute offers students a number of opportunities to study environmental law and policy through hands-on, immersive learning experiences. Our students meet with staff of international NGOs in Southeast Asia and serve as an observer delegation at the UNFCCC in Egypt. They meet with tribal leaders in Utah and hike in the public lands of Montana. They study forestry and ecosystems in our own backyard in Vermont.

Environmental Field Classes

- Balancing Perspectives in Coastal Resource Management: Maine Field Study
- Comparative U.S.-China Environmental Law
- Conservation Agriculture Policy
- Ecology
- Forest Law and Policy
- Global Sustainability Field Study: Havana, Cuba
- International Climate Change: COP in Sharm El-Sheikh, Egypt
- Protected Public Lands and Tribal Rights: Utah Field Study
- Public Lands Management: Montana Field Study

International Environmental Law and Policy

Environmental issues are global issues. The unique opportunities at Vermont Law and Graduate School prepare our graduates to be leaders in international environmental law and policy. Our curriculum is enhanced by study opportunities through our partnerships with leading foreign universities. Hands-on learning through experiential courses, externships, and clinics rounds out the academic experience.

International Courses

- Environmental Governance in the Developing World
- Global Energy Law and Policy
- Global Food Security and Social Justice
- International Climate Change
- International and Comparative Environmental Law
- International Environmental Law and Policy
- International Law of Food
- Transnational Environmental Law Practicum

Experiential Learning

- In the International Climate Change course, students serve on VLGS's observer delegation, attending the Conference of the Parties (COP) and supporting a Least Developed Country state party delegation to engage in the United Nations Framework Convention on Climate Change negotiations through a service-learning partnership
- Through our JD Externship Program, students have interned for a variety of international environmental law actors, including the UN Economic Commission for Europe (UNECE) in Geneva, Refugee Legal Aid Project in Cairo, UN Office of Intergovernmental Support and Coordination for Sustainable Development, and the Cyrus R. Vance Center for International Justice
- The Transnational Environmental Law Practicum combines classroom instruction with project implementation, with students teaming up to work on an environmental-related legal or policy research project for partner organizations in China, Myanmar, Cambodia, Vietnam, or Laos

Hothouse Earth Podcast

The school's podcast, Hothouse Earth, debuted in 2019. Our hosts speak with our faculty and other experts on fast changing environmental law and policy developments like regulatory rollbacks and subsequent lawsuits. Our guests provide concise, accessible conversation on the most pressing issues of our time. Recent episodes include "Quantity Unknown—The Uncertain Future of Vermont's Surface Waters," "Plant Patents, Biodiversity, and Public Domain Seeds," and "Elevate," a miniseries on women in environmental law and policy. Subscribe at hothouseearthpodcast.com.

The Curriculum

ANIMAL PROTECTION

Animal Ethics +

Introduces students to the main ethical approaches applied to humane relationships with domesticated, wildlife, and captive wild animals

Animal Welfare Law

The role of law in understanding and reforming the relationship between humans and animals and improving the condition of animals maintained for human profit and entertainment

Animals and the Law

A survey of American law affecting animals and the legal reforms underway

Animals in Agriculture

The growing body of state and local farmed animal welfare laws, some of which are poised to transform industrial animal agriculture as we know it

Animal Protection Policy +

Explores the intersection of animal protection with other social justice movements, the roles of animals in society, and emerging developments

Connected Justice Seminar: Animals, People, and Places

The legal and political parameters of animals, people, and places, and the possibility of an integrated approach to legally protect their rights

Farmed Animal Advocacy Clinic

Empowers students to become effective animal advocates through real-world work, including initiatives aimed at improving the treatment and status of animals used for food

Undercover Investigations of Animal Operations

The intersection of criminal law, tort, and ethical issues, as well as what does and does not constitute actionable animal cruelty

Science of Animal Law and Policy +

An overview of scientific concepts, thinking, culture, and vocabulary, and how to use this information to inform effective animal protection law and policy efforts

CLIMATE CHANGE

Climate Change and the Law +

How existing laws may address climate change and how new, more comprehensive laws may be fashioned

Climate Change Adaptation in Human Systems

The legal challenges raised by the unavoidable need for our society to adapt to the impacts of global warming

Climate Change Mitigation

The legal, policy, and economic issues in our attempt to mitigate our carbon footprint and reduce greenhouse gasses

Climate Change: The Power of Taxes

How tax systems can be used to reduce greenhouse gases and develop more environmentally compatible technologies

Climate, Extinction, and Adaptation

The ecological, social, and ethical consequences of climate change and various legal and policy options to address it

Climate Justice +

How climate change impacts can or should be distributed; and how those impacts can be addressed through collective action at local, national, and global levels

Fundamentals of Climate Change +

The science of climate change; its social cause and effect, including its disproportionate impacts; and public policy approaches (and critiques)

International Climate Change Law

A study of the UN Framework Convention on Climate Change and its Kyoto Protocol; students represent VLS at COP as members of its Observer Delegation

ENERGY REGULATION

Energy Efficiency Policy

The reasons for, techniques of, and results from energy efficiency measures around the U.S.

Energy Clinic

Students progressively develop knowledge, skills, and values integral to the field of energy law and policy, while helping clients meet local energy needs with reliable, clean, and affordable resources

Energy Law and Policy +

Key issues in American energy policy, and ways to ease the strains that the policy puts upon environmental sustainability

Energy Regulation, Markets, and the Environment +

The legal, economic, and structural issues involved in both energy regulation and energy markets, focusing on electricity

Global Energy Law and Policy

Energy policy frameworks, policies implementing global and regional climate commitments, and emerging issues outside of the U.S.

Oil and Gas Production and the Environment +

The major contracts used to explore for and produce oil and gas in the U.S. and internationally

Renewable Energy Project Finance and Development

Legal and policy issues associated with the development and project financing of renewable energy projects

Sustainable Transportation

This course explores the rapidly changing electricity and transportation sectors, including how electric vehicles can support a smarter, cleaner, more efficient grid

Three Essentials of the Electric Grid

Fundamental legal, engineering, and business knowledge for energy professionals

ENVIRONMENTAL JUSTICE AND PUBLIC HEALTH

Environmental Health Law

An examination of the field of environmental health, including toxic torts, lead poisoning, food protection, and pesticides

Environmental Justice +

Discrimination and justice concerns about the benefits and burdens of environmental protection and natural resource management

Environmental Justice Clinic

Students gain experience working on law and policy issues at the nexus of environment, race, and policy, while also learning essential community lawyering skills

Environmental Restorative Justice

How restorative justice theory and practice can be applied to environmental crimes, conflicts and harms

Fundamentals of Environmental Justice +

Examines the history and evolution of environmental justice social movements in the U.S. and internationally, and causes, impacts, and solutions to environmental racism

Land Use and Racial Justice

The legal framework for understanding planning and zoning from the perspective of race

Native Americans and the Law +

The constitutional, statutory, and jurisprudential rules of law which make up the field of Federal Indian Law

Structural Inequity +

Provides students with an intersectional awareness of structural inequality and systemic racism and their relationships to public policy, law, and environmental movements

Toxic Exposure and Public Health

Looking at federal programs that have allowed disproportionate toxic impacts to persist, from the perspective of community health

FOOD AND AGRICULTURE

Cannabis Law

A survey of cannabis regulation and enforcement, and the current and anticipated regulatory landscapes

Conservation Agriculture Policy

State and federal conservation programs to assist farmers in achieving conservation compliance

The Farm Bill

An introduction to the breadth of policies and legal authorities included in the Farm Bill

Farmworkers and the Law

Tools and strategies used by farmworker advocates, including litigation and legislative and administrative advocacy

Federal Regulation of Food and Agriculture

An overview of the Farm Bill and other laws that affect growing policy, animal husbandry, and food production

Food and Agriculture Clinic

Students engage in law and policy work that addresses challenges related to food and land justice, public health, the economy, food security, and animal welfare

Food Regulation and Policy

Current policies regarding food regulation and how to effectively advocate for policy changes

Global Food Security and Social Justice

The legal landscape of global hunger

The International Law of Food

An analysis of contemporary international legal and policy issues related to food

Introduction to Agriculture and Food Law and Policy

A survey of American law affecting agriculture and food and the traditional divisions between agriculture, food, and environmental regulation

IP and the Food System

In the food system, intellectual property tools can differentiate products, but can also be used to diminish the rights of others, leading to inequity

Local Farm and Food Law

A study of policies that affect distribution of food and state-level initiatives to bolster local food markets

FUNDAMENTALS

Administrative Law

The implementation of legislative policy through administrative agencies

Environmental Appeals

Fundamentals of appellate practice and procedure, and a survey of topics that loom large in environmental appeals

Environmental Crimes

An exploration of the most common federal offense committed by U.S. corporations: environmental crime

Environmental Ethics

The foundations of environmental reasoning: intrinsic value theory, biocentrism, ecofeminism, deep ecology, and spirituality

Environmental Law

The law pertaining to environmental issues such as population, economic growth, energy, and pollution

Land Use Regulation

The traditional legal controls available to regulate the use of land, including local zoning ordinances and subdivision regulations

Legislation and Regulation Survey

An introduction to the legislative process, regulatory agencies, and agency law-making, with a particular emphasis on the legislative process and the administrative state

Science for Environmental Law

The science most relevant to environmental law, including climate science, air and water pollution, toxicology, and endangered species management

+ Available online and on campus

⦿ Available online only

INTERNATIONAL ENVIRONMENTAL

Environmental Governance in the Developing World

Developing and implementing strong environmental governance systems in the developing world

Global Sustainability Field Study: Cuba

A field course focused on sustainable energy and agriculture in Cuba.

International and Comparative Environmental Law

An introduction to comparative law and methodology, and substantive and procedure laws related to environmental public interest litigation

International Environmental Law and Policy

The structure and basic principles of international environmental law and policy

Transnational Environmental Law Practicum

Classroom instruction combined with environmental legal project implementation for partner organizations in China, Myanmar, Cambodia, Vietnam, or Laos

NATURAL RESOURCES

Balancing Perspectives in Coastal Resource Management: Maine Field Study

The common law and statutory underpinnings of coastal resource ownership and use

Biodiversity Protection

An examination of biodiversity, the growing threats to it, and U.S. and international laws to combat those threats

Ecology

A field course on an integrative science that can provide insight into many contemporary environmental problems

Environmental Advocacy Clinic

Law students, supervised by an experienced lawyer, represent clients to promote access to justice on important environmental and natural resources issues

Land Conservation Law

The legal issues around donation of conservation easements and private/public partnerships for land conservation

Natural Resources Law

The statutes and regulations governing the management of the federal lands and their resources

Ocean and Coastal Law

The natural components of estuarine, coastal, and marine ecosystems and some of the conservation issues confronting them

Protected Public Lands and Tribal Rights: Utah Field Study

A Utah-based study of federal laws governing public lands, tribal treaty rights, and other legally protected tribal interests in federal lands

Public Lands Management: Montana Field Study

Montana provides the venue for a comparative study of the competing legal mandates and diverse philosophies of federal land management

Water Quality

The Clean Water Act, the Safe Drinking Water Act and the Ocean Dumping Act

Water Resources Law

The allocation of water among competing claimants—for consumptive uses, waste disposal, recreation, and other purposes

SUSTAINABILITY AND BUSINESS

Environmental Business Transactions

Liability, diligence, and drafting issues in complex environmental business transactions

Environmental Economics and Markets

How market-based tools to protect the environment work, their basic assumptions, and the challenges they face during implementation

Environmental Governance and the Private Sector

How environmental laws and policies interact with business and private sector behavior in adopting environmentally friendly policies

Fundamentals of ESG

How environmental, social, and governance (ESG) factors are increasingly influencing private governance due to pressure from consumers, investors, and regulators

Green Finance

The financing of investment in all financial sectors that integrate environmental, social, and governance criteria into investment decisions

Sustainable Social Enterprise

How social enterprises, such as cooperatives and B Corps, pursue the triple bottom line of sustainable development goals

SKILLS

Advanced Environmental Legal Research

The most useful, efficient strategies and resources for environmental law research

Environmental Dispute Resolution

Alternative dispute resolution processes for resolving complex, multiparty environmental disputes

Environmental Research and Writing

Public policy writing and research, including instruction in social science qualitative research methods such as case studies and interviews

Policy Design

Examines the formulation and implementation of public policy to inform the design of new or modified policies and analysis of existing policies

Quantitative Analysis

The public policy applications of social science quantitative techniques to help students become effective consumers, producers, and critics of evidence supporting policy design and implementation

Environmental Faculty and Teaching Staff

Laurie Beyranevand JD'03

Professor of Law; Director, Center for Agriculture and Food Systems

JD, Vermont Law School;
BA, Rutgers College

COURSES:

Administrative Law; Food Regulation and Policy

Genevieve Byrne

Assistant Professor of Law; Staff Attorney, Farm and Energy Initiative

JD, Lewis and Clark College of Law;
BA, Vassar College

COURSES:

Energy Law and Policy

Jenny Carter JD'86

Assistant Professor of Law; Staff Attorney, Energy Clinic

JD, Vermont Law School;
BA, Rollins College

Christophe Courchesne

Assistant Professor of Law; Senior Attorney, Environmental Advocacy Clinic

JD, Harvard Law School

David Firestone

Professor of Law

JD, Harvard University; BS, Wayne State University

COURSES:

Environmental Law

Laura Fox JD'13

Visiting Professor; Director, Farmed Animal Advocacy Clinic; Douglas M. Costle Chair in Environmental Law

JD, Vermont Law School

COURSES:

Climate, Extinction, and Adaptation

Michael Harris MSL'92

Associate Professor of Law; Director, Environmental Advocacy Clinic; Interim Director, Environmental Justice Clinic

JD, Boalt Hall School of Law, University of California, Berkeley; MSL, Vermont Law School; BA, Pitzer College

Hillary Hoffmann

Professor of Law

JD, S.J. Quinney College of Law, University of Utah; BA Middlebury College

Mark James LLM'16

Visiting Assistant Professor of Law; Senior Energy Fellow, Institute for Energy and the Environment

LLM in Energy Law, Vermont Law School;
JD, University of Ottawa

COURSES:

Energy Law and Policy; Oil and Gas Development and the Environment

Kevin Jones

Professor of Energy Law and Policy; Director, Institute for Energy and the Environment

PhD, Rensselaer Polytechnic Institute's Lally School of Management and Technology; Masters, LBJ School of Public Affairs, University of Texas at Austin; BS, University of Vermont

COURSES:

Energy Regulation, Markets, and the Environment; Environmental Economics and Markets; Global Sustainability Field Study: Cuba; Sustainable Energy Project Finance and Development

Siu Tip Lam

Associate Professor of Law; Director, U.S.-Asia Partnerships for Environmental Law

JD, Northeastern University School of Law;
AB, Harvard University

COURSES:

Environmental Issues in Business Transactions; Transnational Environmental Law Practicum

Yanmei Lin

Associate Professor Of Law; Associate Director, U.S.-Asia Partnerships for Environmental Law

LLM, New York University; Master of Law, Fudan University; BA, Fudan University

COURSES:

International and Comparative Environmental Law; LLM Graduate Seminar; Transnational Environmental Law Practicum

Reed Elizabeth Loder

Professor of Law

PhD, Boston University; JD, University of Connecticut; AB, MA, Boston University

COURSES:

Environmental Ethics

Marc Mihaly**Professor of Law Emeritus**

JD, University of California—Berkeley; BA, Harvard University

COURSES:

Green Finance

**Christine Ryan****Associate Professor of Law; Environmental Law Librarian**

MA, Dartmouth College; MS in library science, Simmons College; BA, University of Connecticut

COURSES:

Advanced Environmental Legal Research

**Janet E. Milne****Professor of Law; Director, Environmental Tax Policy Institute**

JD, Georgetown University Law Center; BA, Williams College

COURSES:

Climate Change: The Power of Taxes; Land Use Regulation

**Emily Spiegel****Professor of Law; Faculty Fellow, Center for Agriculture and Food Systems**

JD, Duke University; BS, Georgetown University School of Foreign Service

**Jeannie Oliver LLM'14****Professor of Law; Staff Attorney, Energy Clinic**

LLM in American Legal Studies, LLM in Environmental Law, Vermont Law School; LLB, University of Auckland

**Benjamin Varadi****Assistant Professor of Law; Senior Fellow, Center for Agriculture and Food Systems**

JD, Tulane University Law School; BA, Burlington College

COURSES:

Cannabis Law, Law and Policy of Local Food, Local Farm and Food Law in Practice

**Patrick A. Parenteau****Professor of Law Emeritus; Senior Fellow for Climate Policy, Environmental Law Center; Founding Director, Environmental Advocacy Clinic**

JD, Creighton University; LLM, Environmental Law, George Washington University; BS, Regis College

**Pamela Vesilind JD'08****Assistant Professor of Law**

LLM in Agricultural and Food Law, University of Arkansas School of Law; JD, Vermont Law School; BA, Guilford College

COURSES:

Law of Animals in Agriculture
