IT IS A LITTLE KNOWN FACT THAT EVERY TOP REGULATOR IN THE ENERGY OR POLLUTION CONTROL FIELD IN CHINA, AND EVERY ENVIRONMENTAL LAW PROFESSOR IN BEIJING AND GUANGZHOU, COME TO THE UNITED STATES FOR GUIDANCE. AND WHEN THEY COME, THEY COME TO SAN FRANCISCO, WASHINGTON, D.C., AND SOUTH ROYALTON, VERMONT.”

— Marc Mihaly, President and Dean, Vermont Law School

A small, committed law school in rural Vermont is changing the game. Join us.
NOTHING BUT THE TRUTH

IT STARTS HERE–AND GOES GLOBAL

SOUTH ROYALTON, VERMONT, IS A SMALL NEW ENGLAND TOWN WITH A POWERFUL HEART. For more than 40 years, a singular, outward-looking law school here has been pumping lifeblood with a particular DNA into the wider world. Vermont Law School is nationally known for its environmental and social justice programs, but our students are diverse and resist narrow labels. They are scientists, hackers, hikers, and musicians; they are talented, sometimes quirky, restless, engaged, entrepreneurial self-starters who believe in community and the power of the law to do good; they are socially-conscious risk-takers with big ideas; they are idealists interested in practical training; they are friends and activists, and they become kick-ass lawyers.

While diverse, our students share this in common: They come to law school not to fit into the status quo, but to change it. They learn what it means to fight—often against powerful interests and powerful odds—on the sides of justice and truth. Their degrees are only the start of diverse career paths that lead to high-level positions with influential agencies; they become organizers of grassroots movements, partners in top law firms, and leaders in organizations such as The World Bank, USAID, and Earthjustice; they become general-practice attorneys in rural areas that lack access to justice and criminal defenders in minority districts; they practice solo and in small firms, doing what they can to change their corners of the world.

“I COULD ALREADY SPEAK SPANISH BEFORE I BECAME A STUDENT. AT VERMONT LAW SCHOOL I LEARNED HOW TO SPEAK THE LAW.”

MIAMI VICE

Criminal defender Adolfo Gil JD’09 brought his law degree home to Miami-Dade County, Florida, where many of his clients don’t understand the languages, let alone the laws.
UNAFRAID

Wynona Ward JD’98 turned her firsthand experience of domestic violence into a tough, compassionate organization that provides free legal and social services to abused women and children throughout rural Vermont. She modeled her mobile practice—Have Justice Will Travel—on Vermont Law School’s South Royalton Legal Clinic, and now routinely hires VLS graduates and students to help her in her work. I tell the students, “You want to see the real Vermont? Come with me. I’ll show you the back roads and the broken-down trailers and broken-down farmhouses. I’ll show you where traumatic and frightening secrets hide.”

GRADUATES OF VERMONT LAW SCHOOL WALK THE TALK THROUGHOUT VERMONT AND ACROSS THE U.S. AND IN 20 COUNTRIES AROUND THE GLOBE.

They take what they’ve learned in South Royalton, and speak truth to power. They are creative, disruptive change agents who go into public and nonprofit sectors at nearly twice the national law school average, who see a law degree as the start not only of constructive careers but of meaningful lives. They are committed, often altruistic, sometimes outraged, and resolute. They defend, litigate, and advocate on behalf of battered women and neglected children; on behalf of wetlands and clean air and threatened habitats; on behalf of new immigrants and low-wage workers; on behalf of policies that are just. At rallies and protests, public hearings, information sessions, organizational meetings, school board meetings, food banks, in front of lawmakers and judges and behind the scenes: they show up. In matters of truth and principle: they stand up. As a grateful client of one VLS-trained attorney said, “You think one person can’t make a difference? One person made all the difference.”
At Vermont Law School, students and professors are deeply engaged with the issues of our time. Reminders are everywhere. Our power comes from renewable sources. In Vermont there are no billboards, because our faculty helped create the laws 40 years ago that prohibit them. The “environment” here is not an abstraction: it’s the point, and students are immersed in it every day in every season. There are more Community-Supported Agriculture farms per capita in Vermont than in any other state—22 small farms and orchards operate within a 10-mile radius of the law school’s central building, Deboervoise Hall. Students interested in agriculture systems can get their hands dirty here. Vermont Law School was one of only two law schools in the country that stood against the military’s discriminatory Don’t Ask Don’t Tell policy, and it wasn’t a passive stance. Faculty presented white papers on the policy’s legal issues. Students traveled each year to Washington to lobby Congress. They held bake sales to fund their trips. On campus, the administration used its military recruiting policy as an ongoing opportunity to articulate and defend the school’s position—and to keep the conversation alive in a community that is unusually engaged in matters of fairness and matters of principle.

That engagement is in the air and in the water. It animates our classrooms and our mealtimes. It brings students of all backgrounds together in common cause. It is a big part of the beating heart.
AMONG THE FACULTY AT VERMONT LAW SCHOOL ARE FORMER EPA REGULATORS, former members of the U.S. Nuclear Regulatory Commission, a co-founder of the Natural Resources Defense Council, attorneys who served as general counsel for Amnesty International and the National Audubon Society and the U.S. Department of Agriculture, and attorneys currently in private practice. Faculty members include nationally known scholars in the fields of water law and energy law and neurolaw, professors with dual appointments at Harvard and visiting fellowships at Oxford, and instructors of writing whose students have won the top legal writing prize in the nation three times in the past five years. They author books and journal articles and op-ed pieces for The New York Times and The Washington Post. They march on Washington and show up on Town Meeting Day.

They know what it takes to make a difference in the broader world, because they have been there. They are the opposite of provincial and retiring. They teach a brand of activist law, on their terms, because they know that the most effective attorneys and advocates are those who are actively engaged.
Attorney Alma Walls JD’01 located her solo practice in the Mississippi Delta, in her hometown of Clarksdale. She now fields calls from the entire region, sometimes working with clients from as far as 75 miles away, many of them uneducated or unable to read. She’s not sure where they would turn without her. “I’ll do whatever I can for them,” she says. “There really is so much need.”
THE EXPENSE OF HIGHER EDUCATION, INCLUDING LAW SCHOOL, HAS BECOME A NATIONAL CHALLENGE, AND THE ISSUE OF COST HERE IS ESPECIALLY ACUTE. A still-young institution with no historical endowment, Vermont Law School relies heavily on tuition while remaining committed to providing the most expensive kind of law education: one that offers small class sizes, clinical settings, and on-the-ground training. As more students face or take on higher loan debt, the law school is also committed to enabling its graduates to continue to go into lower-paying public service careers. Our merit scholarships make it possible for the best and brightest to come to Vermont Law School and, afterward, go where they can do the most good. Our Loan Repayment Assistance Program offers help to graduates who work in legal services and advocacy groups, who work as public defenders or prosecutors, in nonprofits, in the nonlucrative but crucial work of serving underserved communities and saving the earth.

The pro bono publico ethic is reinforced by teaching and by example, by the special character of the students who choose to study at Vermont Law School, and by the many ways the law school practices what it preaches by serving the legal needs of a region and a state.
LOCAL
Born in the Bahamas, Randolph “Chris” Knowles JD’15 grew up surrounded by extreme wealth and extreme poverty. As founder and director of the Caribbean Sustainable Development Organization, he works with island governments to bring back once-thriving industries—fishing, pineapples, salt, straw-weaving—that have been displaced in recent decades by low-wage tourism. “The economics of tourism,” he says, “continues the exploitation that’s so much a part of the history here.”

“PEOPLE SOMETIMES THINK, ‘OH, IT’S IN LITTLE SOUTH ROYALTON, VERMONT,’” says Professor Stephanie Farrior, an international expert on human rights. “But from its founding, there’s been a strong consciousness at Vermont Law School about the world and the role we play in it. There’s a shared sense among students, faculty, and staff that we are part of something larger than ourselves.” From the beginning, the desire to make a difference—locally, globally—has driven us. LAW FOR THE COMMUNITY AND THE WORLD is not a mere motto to market our school. It is our modus operandi. We are on the ground, around the globe, effecting change where it matters most: in human rights, animal rights, environmental law and policy, energy regulation, criminal justice, government, economics, and more.

LOCAL
Born in the Bahamas, Randolph “Chris” Knowles JD’15 grew up surrounded by extreme wealth and extreme poverty. As founder and director of the Caribbean Sustainable Development Organization, he works with island governments to bring back once-thriving industries—fishing, pineapples, salt, straw-weaving—that have been displaced in recent decades by low-wage tourism. “The economics of tourism,” he says, “continues the exploitation that’s so much a part of the history here.”
THE SKY, THE LIMIT

An inbound jet descends into Washington’s Reagan National Airport, contributing to the aviation industry’s estimated 2 percent of total global greenhouse gas emissions. As the Federal Aviation Administration’s lead advisor on a market-based plan to reduce emissions from international aviation, Dan Williams JD’10 works with experts to design recommendations related to aircraft technology, operational improvements, and alternative fuels—which he then communicates and negotiates with industry players, NGOs, and governments around the world.

“OUR TARGET IS TO DESIGN A BLUEPRINT FOR CARBON NEUTRAL GROWTH STARTING IN 2020.”

FAST-DEVELOPING COUNTRIES INCLUDING CHINA AND MYANMAR LOOK TO US FOR CASE STUDIES AND SOUND POLICY IDEAS. Around the globe, nations grapple with a widening gap between rich and poor, conflicts intensify as growing populations compete for ever-more-constrained resources, and over everyone hangs the specter of a warming planet. Vermont Law School feels compelled to respond. As Marc Mihaly, VLS president and dean, has said, “Climate change models now predict catastrophic impacts by the year 2050. That span between now and 2050 represents the span of careers of the people sitting in our classrooms right now. That’s their shot, and they know it.”
FROM THE BEGINNING, VERMONT LAW SCHOOL HAS BEEN MARKED BY A CERTAIN GO-FOR-IT OPTIMISM. That is a bright line here. Our students are taught by leading thinkers and doers who have fought on the front lines of environmental battles and won. Who have been architects of patient progress and voices for the not yet heard. The law school’s campus sits in central Vermont’s White River valley, but the vantage here has always held the long view, on the distant horizon of what’s possible and what’s sustainable. By the time our students earn their degrees, they have not only gained expertise but absorbed a powerful, life-affirming message: If you want to make change that is lasting, the law is where the power is.

In our communities and our world, law is how we divide our rights and responsibilities. It’s how we organize our corporations and co-ops, how we structure markets, how we create policies and regulations, how we agree and how we resolve disagreement.

Students truly interested in making an impact on the world—in the private, public, or social sector—need the tools of the law in order to know how to get things done. Vermont Law School is nimble and perhaps uniquely positioned to train the leaders who will shape our changing world. In some cases that might be reflected in the lawyers and advocates who are crafting the new standards and systems and innovations driving a more diverse, local, sustainable food system. (VLS has one of the few food and agriculture law and policy centers and clinics in the nation.) Or in the entrepreneurs behind socially-responsible business. (VLS offers an innovative joint-degree program with the University of Vermont accelerated Sustainable Entrepreneurship MBA.) Or in the local heroes fighting for affordable housing and living wages and strengthening the fabric that supports and protects us all.

WHAT SUSTAINS US

Locally crafted microbrew from Zero Gravity Craft Brewery is poured at American Flatbread in Burlington, Vermont. Both the brewery and restaurant are part of the localvore/small food movement. “This business is loaded with partnerships, each one different, and all contract-based,” says Rob Downey JD’93, a partner in both enterprises. “My legal background allows me to think on my feet. I can negotiate my own deals.”
WE HAVE REACHED A HISTORIC MOMENT. The environment has moved from an issue in society to the issue. The urgency and interest in our rapidly changing climate have created an area of the law that is so complex that it’s no longer a single field: It’s land use. It’s pollution control. It’s fisheries. It’s carbon sequestration. It’s energy.

If you care about the environment, energy policy is the single most important influence. In America, where 40 percent of all carbon emissions come from power plants making electricity, the disputes about these issues are settled through the legal system. Vermont Law School—with the nation’s largest environmental law program, with its law-firm-within-a-law-school Environmental and Natural Resources Law Clinic, with its extraordinarily well-connected network of alumni—has gone toe-to-toe with state and federal agencies and multinational corporations, and has shaped environmental law and policy at the highest level. And always with the future in mind.

WE'RE CONSTANTLY IMPRESSING OUR COLLEAGUES WITH THE AMOUNT OF ENERGY KNOWLEDGE WE HAVE AT SUCH AN EARLY POINT IN OUR CAREERS.”
Established in 2012, CAFS provides support, research, and leadership for community-based agricultural systems, sustainable agriculture advocates, agencies, food hubs, incubators, and farmers. The center has become a national resource for the tools and policies that will create a just food system that is good for people and good for the planet.

FOOD AND AGRICULTURE LAW CLINIC
The Food and Agriculture Clinic equips students with practical skills to be sustainable food and agriculture advocates and entrepreneurs. Only a handful of law clinics nationwide are exclusively dedicated to food and agriculture. Vermont Law School is the only law clinic in the country to practice and teach food systems advocacy and social entrepreneurship as combined disciplines.

ENVIRONMENTAL AND NATURAL RESOURCES LAW CLINIC
Since 2003, the ENRLC has provided a hands-on, structured, supportive learning experience in which students develop real-world skills in environmental litigation, administrative processes, and client counseling. From dirty coal to nuclear safety, some of our victories have been game-changing.

ENVIRONMENTAL DISPUTE RESOLUTION
Thirty years ago VLS launched one of the nation’s first programs to teach the skills of dispute resolution—negotiation, mediation, and arbitration—that today have become even more critically important to environmental professionals.

ENVIRONMENTAL TAX POLICY INSTITUTE
By analyzing the ways in which taxation can be used to address environmental problems, the institute seeks to better inform the public policy debate about the role of environmental taxes at the local, state, and federal levels.

INSTITUTE FOR ENERGY AND THE ENVIRONMENT
The IEE has become a national and world resource on energy law and policy with an advanced curriculum in energy and regulatory law. Students learn how to use the law to shape policies that promote energy efficiency, reduce greenhouse gas emissions, promote renewable energy, and increase energy independence.

ENERGY CLINIC
Launched in 2014 as the first full academic year energy clinic in the U.S., Vermont Law School’s Energy Clinic focuses on solar power development in the context of justice and the environment and what we want the world to be in 50 years. With particular emphasis on the legal models that advance community solar ownership, the clinic provides opportunities for JD, LLM, and Master of Energy Regulation and Law (MERL) students to progressively develop the knowledge, skills, and values integral to the practice of energy law and policy, while helping its clients meet local energy needs with reliable, clean and affordable resources.

INTERNATIONAL ENVIRONMENTAL LAW AND POLICY
Environmental issues are global issues, and Vermont Law School offers a curriculum of more than a dozen international environmental courses, enhanced by study opportunities through partnerships with leading foreign universities.

U.S.-ASIA PARTNERSHIPS FOR ENVIRONMENTAL LAW
Founded in 2006, U.S.-Asia PEL seeks to strengthen environmental laws in China and Southeast Asia and by building capacity among individuals and academic, government, and private-sector institutions to solve pollution and energy problems.

WATER AND JUSTICE PROGRAM
This program seeks to advance the idea that water is a public, common-pool resource and uses water law, environmental justice, and policy initiatives to further this aim. Student research associates contribute to reports, conference presentations, legal analyses, and articles.

SUMMER SESSION
The Environmental Law Center brings together teachers, students, and distinguished thought leaders in a world-renowned, intensive summer study of environmental law and policy.

VERMONT JOURNAL OF ENVIRONMENTAL LAW
In addition to publishing in Vermont, VJEL students run VIEL – an annual symposium, reaches national audiences through its Top 10 Environmental Watch List, and brings commentary on environmental law and policy through its colloquial EcoPerspectives Blog.

FOUNDED IN 1978, THE ENVIRONMENTAL LAW CENTER AT VERMONT LAW SCHOOL HOUSES THE LARGEST GRADUATE ENVIRONMENTAL LAW PROGRAM IN THE COUNTRY, and is consistently ranked the nation’s best by U.S. News & World Report. The multidisciplinary program positions graduates to take lead roles in solving the world’s most complex and significant environmental problems, from land use to water law to the interconnected problems of climate change. We have planted a flag here for a simple reason: Because you can’t solve the world’s problems without educating the world’s problem-solvers.
CLINICS

CRIMINAL LAW CLINIC
DISPUTE RESOLUTION CLINIC

EXPERIENTIAL ADVOCACY PROGRAM
Second- and third-year JD students can learn by solving problems—just as practicing lawyers do on a daily basis. Meshing substantive law with professional training, the hands-on Experiential Advocacy Program encourages creativity, collaboration, and self-reliance while providing a setting for participants to experiment with legal solutions. Through small classes taught by real-world practitioners, students learn to frame and address problems from different perspectives and design and implement a wide range of strategies.

EXTERNSHIPS
FULL-TIME JD EXTERNSHIPS (SEMESTER-IN-PRACTICE)
JUDICIAL EXTERNSHIPS
PART-TIME JD EXTERNSHIPS
MASTER'S EXTERNSHIPS

Vermont Law School offers externships for JD, master’s, LLM and joint-degree students. Students can enroll in either full- or part-time programs that place them in a variety of legal and judicial settings. In recent years, our students have received placements in private firms; corporate legal departments; criminal law offices; city and state governments; in international law, immigration law, and energy law; in courts of appeals, U.S. District Courts, and state Supreme Courts; in local, state, and federal agencies; and in nonprofits of all sizes. Our placement process is student-driven and geographically unrestricted. On a daily basis, our office explores new and exciting opportunities for students—in interesting places, with mentors who use the power of the law to make a difference.

REAL WORLD EXPERIENCE

In our law clinics and externships, you may have the chance to work with incarcerated women in Vermont or help block construction of a low-sulfur, high-sodium coal mine in southwestern Montana. You may help set national governance standards for farmers' markets or spend a semester working at an NGO in Washington, D.C., or question a witness on the stand or confer with a state Supreme Court judge in chambers. Students in our Energy Clinic, just one example—may learn in the classroom the theory behind community solar projects, then have the opportunity to develop the legal structures for an actual project, then help install the solar array on the ground.

The clinical and externship setting, unlike anything else, gives students a chance to be creative, to take risks, to work on real cases with real consequences. That changes the way they think. It changes their skill set. It changes what they want to do with their lives. It teaches fundamental legal skills. It shows how lawyers, judges, and mediators integrate theory and skill in real time, in the presence of the pressures and sometimes the chaos that they encounter in everyday practice.

Even while you’re a student: You can make a difference in the lives of real people.
DEGREES AND PROGRAMS

As the nation’s premier environmental law school, VLS offers a juris doctor (JD), three master’s degrees, and four master of laws (LLM) degrees—all created to produce leaders who want to change the world. We also offer flexible, online options for students.

JURIS DOCTOR (JD)

JURIS DOCTOR (3 YEARS)

The core JD curriculum focuses on legal doctrine and analysis, emphasizes the broader social context of the law, and provides education in the skills and values needed for effective law practice. Our flexible JD program offers an opportunity both for concentration in a particular area of the law and for a broad preparation suited to general practice in all 50 states. JD students can participate in a wide range of clinics and externships, along with additional experiential and specialized learning opportunities that include the following:

- Environmental Law Center
- Center for Agriculture and Food Systems
- Center for Applied Human Rights
- Center for Legal Innovation
- International and Comparative Law Program
- Environmental Tax Policy Institute
- Institute for Energy and the Environment
- Sports Law Institute
- Legal Writing Program
- U.S.-Asia Partnerships for Environmental Law
- Dispute Resolution Program
- Experiential Advocacy Program
- Water and Justice Program

ACCELERATED JURIS DOCTOR (2 YEARS)

The Accelerated Juris Doctor program at Vermont Law School enables highly motivated students to earn a JD degree in less time and to reduce costs associated with living expenses while enrolled. VLS offers two accelerated start options, the Summer Start AJD Honors program and the Fall Start AJD program.

- The Summer Start AJD Honors program guarantees admitted students a one-year tuition scholarship plus eligibility for additional merit- and need-based funding. Summer Start offers the opportunity to study and experience Vermont in a small group before joining first-year JD students in the fall and taking upper-level classes. Further, AJD students who begin in the summer are prepared to sit for the bar in July and return to work a full year ahead of their traditional JD-track peers.
- AJD students who start in the fall complete their coursework in August of the second year and can sit for the bar the following winter. Students admitted into the Fall Start AJD program must meet a GPA requirement to continue in the AJD program. Students who do not meet the GPA requirement will continue with the traditional program.

As an AJD student, whether Summer Start AJD Honors or Fall Start AJD, you’ll have full access to Vermont Law School’s curriculum, clinical programs, and experiential opportunities while completing your law degree in two years. Even within the condensed schedule, you’ll have time to participate in all student groups and be eligible to work on the Vermont Law Review or the Vermont Journal of Environmental Law.

REDUCED-RESIDENCY JURIS DOCTOR (3 YEARS)

Committed to providing students with flexible options, Vermont Law School offers a Reduced-Residency Juris Doctor (RRJD) program that enables students to earn a portion of their degree requirements off campus through a combination of a Semester-in-Practice (SIP) externship and upper-level, online JD courses.

- The Summer Start AJD Honors program guarantees admitted students a one-year tuition scholarship plus eligibility for additional merit- and need-based funding. Summer Start offers the opportunity to study and experience Vermont in a small group before joining first-year JD students in the fall and taking upper-level classes. Further, AJD students who begin in the summer are prepared to sit for the bar in July and return to work a full year ahead of their traditional JD-track peers.
- AJD students who start in the fall complete their coursework in August of the second year and can sit for the bar the following winter. Students admitted into the Fall Start AJD program must meet a GPA requirement to continue in the AJD program. Students who do not meet the GPA requirement will continue with the traditional program.

As an AJD student, whether Summer Start AJD Honors or Fall Start AJD, you’ll have full access to Vermont Law School’s curriculum, clinical programs, and experiential opportunities while completing your law degree in two years. Even within the condensed schedule, you’ll have time to participate in all student groups and be eligible to work on the Vermont Law Review or the Vermont Journal of Environmental Law.

MASTERS DEGREES

A master’s degree from Vermont Law School is different. Instead of studying theories about how to change policy, our master’s candidates learn the law and how to use it to effect change. By studying advocacy, regulations, legislation, and markets, they acquire the tools to create a more sustainable world. All of our master’s degrees can be pursued jointly with our JD program and online.

MASTER OF ENVIRONMENTAL LAW & POLICY (MELP)

Our MELP program is focused on the political, scientific, and communications aspects of environmental law, with an added emphasis on economics and advocacy. Our innovative curriculum is comprised of traditional law offerings and MELP-specific courses in writing and advocacy designed to benefit graduates in the public and private sectors. Flexible options allow candidates to complete the program in as little as 12 months. Experiential learning opportunities with state and federal agencies, nonprofit organizations, and advocacy groups ensure that MELP graduates are prepared for real-world situations the first day on the job.

MASTER OF ENERGY REGULATION AND LAW (MERL)

The MERL degree provides students with practical training in public advocacy and writing for a legal and policy audience, opportunities for independent research with support from faculty, and externships at organizations around the country and the world. Designed to be completed in as little as 12 months, the MERL provides students with a broad-based understanding of the intersection of energy and law, regulation, policy, and economic analysis.

MASTER OF FOOD AND AGRICULTURE LAW AND POLICY (MFALP)

With an array of residential and online courses, and clinical training in one of the nation’s first food and agriculture clinics, the Master of Food and Agriculture Law and Policy (MFALP) offerings reflect a powerful marriage of agriculture policy, food safety, and environmental law. Most students complete the 30-credit MFALP in 12 months.

LLM DEGREES

Like the master’s degrees, the LLMs require one year of study and can be taken part-time. These programs require applicants to have a JD degree, and are geared toward students interested in pursuing specialized careers in environmental and energy law or higher education. All of the LLM degrees can be taken online, except for the LLM in American Legal Studies.

LLM IN AMERICAN LEGAL STUDIES

The Master of Laws in American Legal Studies is designed for students who hold a law degree from an institution outside the United States. As one of the few American Legal Studies degree programs that includes all of the course requirements to be eligible for the New York and Washington, D.C., bar exams, the LLM prepares foreign-trained lawyers to practice in important cities in the United States.

LLM IN ENVIRONMENTAL LAW

The LLM in Environmental Law is a 30-credit degree program whose cornerstone course is the Graduate Seminar, in which guest speakers lead discussions on a variety of current environmental issues. Many LLM students will choose to complete an externship, research project, a teaching practicum, or a thesis based upon their professional goals. The curriculum also offers a number of experiential learning opportunities with state and federal agencies, advocacy groups, and international organizations.

LLM IN ENERGY LAW

The LLM in Energy Law degree program is designed for students who wish to pursue intensive study and training in the field of energy law and policy. New demands for energy conservation and the rise of alternative energy technologies, along with the serious environmental problems associated with traditional power generation, are creating a host of new law and policy challenges for energy companies, private law firms, regulators, and legislators. Students graduating with the LLM in Energy Law from Vermont Law School will have the expertise to perform the sophisticated legal work needed to address these challenges.

LLM IN FOOD AND AGRICULTURE LAW

Our new LLM degree in Food and Agriculture Law—for students with their JD training already behind them—promises to provide training that will lead to creative new policies and legal tools, new standards and regulations, new markets, and new innovations that will allow a more diverse, local, and sustainable food system to take root and flourish.
WE ARE COMMITTED TO DEVELOPING A GENERATION OF LEADERS WHO USE THE POWER OF THE LAW TO MAKE A DIFFERENCE IN OUR COMMUNITIES AND THE WORLD.

BECAUSE THE STATUS QUO IS NO LONGER ACCEPTABLE.
